

**Kerbonov Parts Pack**  
Mods  
31,277 Downloads   Last Updated: Dec 25, 2016   Game Version: 1.2.2

[Description](#) [Files](#) [Images](#) [Relations](#)

The Kerbonov Kn-2 module is a compact 3 Kerbal cockpit for use with intermediate sized aircraft. It includes an IVA view.

The Kerbonov Kn-7 cockpit also seats 3, and is designed for use withthe MK2 spaceplane fuselage parts.

Also packaged in the zip are several additional parts:

- Hood ornament: A snazzy little chrome doodad for classing up your horrible spaceplane / rocket death dragster.
- Probe RCS: A tiny, low powered RCS block with its own small monopropellant supply built in. Good for unmanned micro-probes.
- Drop tank: Lightweight, streamlined jet fuel pod. Includes its own built in decoupler for when it runs dry.
- Radial Micro Decoupler: What it says on the label. Now itsy bitsy ships can benefit from asparagus staging too.
- RATO Booster: A bit like a bigger, heftier sepatron, except stackable.
- Grid Fins: Fits a very large effective surface area into a compact (front to back) package. Can be retracted when not in use.
- Heavy Duty Command Seat: A tougher, heavier, stack-attachable external command seat.
- Small Inline Passenger Can: A single-seat, 1.25m diameter hitchhiker container for spaceplanes.
- Mini Turbojet: A jet engine suitable for ultralight aircraft and UAVs.
- VHF Antenna: A fixed, stack-mountable 5M-rated standard antenna.
- a few others

IMPORTANT NOTE: The grid fins are dependent upon Linuxgurugamer's **RetractableLiftingSurface Module** (<http://forum.kerbalspaceprogram.com/index.php?/topic/145583-12-retractableliftingsurface-module-released/>) for their folding to work correctly. It won't break the game to not have that installed, but retracting/extending the fins won't DO anything.

Hi

New at this posting lark but here goes  
I really like the mod but what are the chances of getting an IVA for the HD seat. I use the KN2Cabin for the majority of my Rovers, would like to use a first person view for the HD Seat instead of 3rd person.

The only problem with this mod is it seems that it is the Cockpit is disproportionaly small for three kerbals. Maybe 1 kerbal in the cockpit and 1 in the passanger sear. not 2 side by side. a 2.5 would seem right for side by side. Ah well, still a great mod

I used the KN-2 cockpit for a quick orbiter I made. Sometimes spaceflight is all about the view!

Looks great! cant wait to use it!  
Oh and great job actually including IVAs! Not that many mods include IVAs for everything!

This looks like a good pack. I love how the command pod looks, can't wait to throw one at Duna

Looks interesting, definitely interested in the lightweight engine and the 50l tank, as well as the Crew Tank, can't wait to use it :D
